

# WEB HOSTING AND COLLOCATION

## Web Hosting

Hosting with OneStream Networks allows you to maintain a website on high-performance servers, securely housed in world-class datacenters with high speed, redundant access to the Internet. You get the benefits of Internet presence, access to millions of viewers, reliable servers and connections - without buying expensive servers and paying for dedicated high speed Internet connections.

By offering flexible, cost-effective hosting packages, OneStream Networks ensures that your business only pays for what it needs and that you have the right options from the right partner as you grow.

### Hosting Specifications:

Windows 2000 Operating System

Traffic Analysis Reporting

#### Web-Pak Premium \$40/mo.

Up to 200 Mb Web Site Storage  
Up to 5 Gb Usage  
10 Free Web Email Accounts  
Traffic Analysis Reporting

## Server Collocation

Locate your server in OneStream Networks' world-class data center facilities and take advantage of our redundant Tier 1 Internet connections, redundant power, 24/7 video monitored security and disaster protection. You benefit from the fastest possible delivery of web information from your own server and eliminate the need to build and support your own network, infrastructure, and IT staff.

OneStream Networks offers both dedicated and common space server collocation. Our flexible pricing model provides a cost-effective solution whether using rack-mounted blade servers, standard server towers, or requiring an entire rack or cabinet. We will customize to your specific space and power requirements.

### Data Center Facilities:

Redundant Tier 1 Backbone (Verizon, Qwest)  
High-Performance Redundant Cisco Infrastructure  
BGP4 Routing Protocol and Load Balanced Network  
Primary and Secondary Domain Name Service (DNS)  
Climate-Controlled, Fire Detection Server Room

24/7 Traffic Graphs and Utilization Reports  
24/7 Network Monitoring  
24/7 Port Monitoring  
Surveillance Cameras  
Secure Key Pad Entrance

#### 1U Server \$75 per month

19" 1U server in common-area space  
Power is additional at \$25/amp/month  
Bandwidth - includes 1MB\*  
IP Block - includes /29 Block(5 usable)

#### 2U Server Bundle \$125 per mo. (SAVE 30%)

19" 2U server in common-area space  
Power - includes 1 amp  
Bandwidth - includes 1MB\*  
IP Block - includes /29 Block(5 usable)

### Why OneStream Networks?

The business world is fast becoming IP-centric, forcing organizations to evaluate their readiness to move to a single converged network. In the future, how well an organization achieves convergence will determine its profitability and potentially even its survival. At the same time, companies are faced with the delicate balancing act of managing the inevitable transition to converged IP while continuing to support their business.

The key to overcoming these challenges is the right partner. OneStream's flexible portfolio of connectivity and managed services is well suited to meet the unique needs of every organization. Furthermore, OneStream's deep IP expertise and proven convergence experience provide the insight and assistance to ensure success.

OneStream Networks can help you understand the benefits of convergence, assess the business challenges it addresses and help you develop an effective, all-encompassing strategy to harness the power of convergence.
