

iPhone Integration Overview:

OneStream Networks offers two ways to extend the power and cost-savings of the Sylanro hosted PBX feature server to iPhone users globally. Both options below include the ability to bypass “cellular” usage costs by utilizing the user’s hosted PBX seat license and corporate network to transport calls at no cost.

Cortex Mobile:

Description:

Custom iPhone app developed by in-house OneStream engineers using Cortex management layer. Enables easy iPhone access to the end-user web portal through which users may access features, modify Find-Me-Follow-Me (FMFM) forwarding, check call logs, directories, etc. Users may also initiate iPhone calls via Cortex Mobile. This service allows users to initiate calls and conference calls (up to 5-party) using their corporate Sylanro PBX seat license. The benefit is that users can leverage the no-cost, on-net long distance and international calling capabilities of the corporate voice/data network without incurring expensive cell-based long distance and international rate calling.

Fring (<http://www.fring.com>):

Description:

fring™ is a mobile internet communication service that is free to download and that may be utilized with iPhone service. Using your handset’s internet connection, you can interact with others on all your favorite social networks (Skype®, MSN Messenger®, Google Talk™, ICQ, Twitter, Yahoo!™ and AIM®) and utilize OneStream Networks SIP service for corporate on-net no cost calling globally.

fring puts all your online friends into one, dynamic fringFriends™ buddy list, which is always connected so you can enjoy free calls and instant messaging with all your online friends, see their real-time status, and even find each other’s actual location.

fring also lets you make affordable local and international calls to landline and regular cellular numbers using your OneStream corporate SIP voice service. The benefit is that users can leverage the no-cost, on-net long distance and international calling capabilities of the corporate voice/data network without incurring expensive cell-based long distance and international rate calling.

Cost: FREE per user
