

OfficeExpress The Ultimate Work @ Home

communications that connect

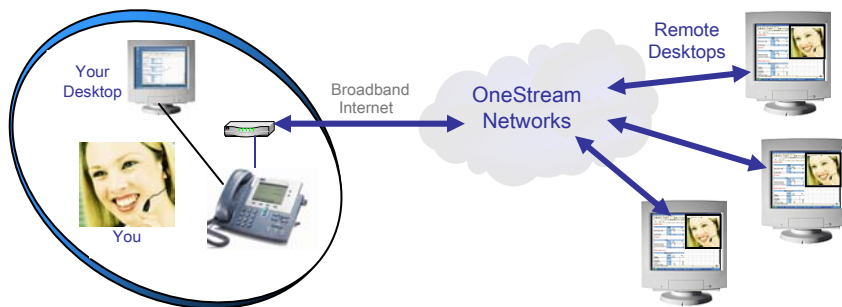

OfficeExpress Complete Business Infrastructure ... at Home

OneStream Networks redefines the Remote Worker experience by bringing unprecedented flexibility, productivity, and ease-of-use together with *OfficeExpress*. Each *OfficeExpress* user is equipped with a high-performance Cisco IP speakerphone, Web Portal, Web Camera, and 3-party Desktop Collaboration software. Using your existing broadband IP connection, OneStream Networks powers world-class business features and functionality including unlimited local and inter-office calling, 4-digit interoffice dialing, voicemail, visual voicemail, unified messaging, find-me/follow-me forwarding, and desktop application/presentation sharing with video. The result is a fully-integrated remote office solution that extends business functionality beyond the office and enables the remote worker to be more productive, more accessible, and more professional. And, with competitive monthly pricing, *OfficeExpress* is easy on the budget.

With *OfficeExpress*, your company has the **Ultimate Work@Home** suite of services, including:

- 4-Digit On-net Dialing to other office Extensions
- Voicemail, Unified Messaging, and Visual Voicemail
- Find-me/Follow-me Integration to Cell Phones and Land Lines
- Professional Telephone with Built-in Data Switch and Robust Hands-free Speakerphone
- Full Desktop Collaboration
- Add optional business-class Web Mail with Instant Messaging and Calendar Sharing

OfficeExpress at a glance

Next Generation Complete IP Home Office Solution

- **Single Source Solution** – All-in-One office solution designed for the home-based user and provided over existing broadband.
- **Complete Solution** – PBX functionality, including one (1) Cisco 7940 IP telephone, 10-digit phone number, local and long distance calling, and collaboration with video.
- **Integration with other Offices** – Communicate more efficiently with common voicemail platform, 4-digit dialing, common auto-attendant, common live attendant, and inherent internetworking with free on-net calling.
- **Flexibility/Ubiquity** – Deploy extensions seamlessly anywhere in the world! *OfficeStream* sites immediately become 4-digit extensions on your "system" and benefit from improved functionality.
- **Reduce Costs** – Unlimited local and office-to-office calling combined with aggressive long distance packages reduces overall costs.
- **IP Migration Strategy** – May be fully "integrated" with your main site via OneStream Network's *LinkStream* or *OfficeStream* products.
- **Gain Control** – Single provider and single bill increases control and reliability.
