

# OneStream Networks Customer Application

## Company Profile:

- Global Private Equity, Credit and Real Estate Asset Management - \$113+ billion in assets
- 800+ employees
- 13 offices globally

## Communications Environment:

- Legacy Avaya phone systems and decentralized design
- Legacy gateways connecting expensive ISDN PRI/PRA circuits globally
- Multiple Telco carriers limiting ability to consolidate and gain economies
- 3<sup>rd</sup> Party Audio Conference services with high monthly expense
- 2 Global MPLS backbones for private data

## Desired State:

- Unified IP communications leveraging Avaya
- Eliminate Telco carriers, reduce costs
- Internal Conference Bridge service
- High-availability global voice design
- Maximum security and compliance

## OneStream Networks Solution Highlights:

- **Geographically-redundant SIP Trunks.** Customer SBCs connected to OneStream for over 1,400 SIP concurrents at five (5) global SuperPOP data centers. Offers maximum availability and uptime.
- **Integrate with Existing MPLS.** OneStream designed and deployed MPLS network interfaces with two (2) global MPLS providers enabling the private mapping and seamless failover of voice packets between data centers and networks with benefit of QoS globally.
- **Port and Consolidate 8,000+ global DID numbers.** OneStream consolidated 8,000 DIDs in 8 different countries for delivering to redundant SIP trunks.
- **Avaya Aura Certified Solution.** OneStream is a gold member of Avaya DevConnect. OneStream Global SIP trunking is certified with Avaya Aura CM/SM/Acme Packet & Siperia SBC.
- **Internal Conference Bridge Support.** OneStream providing over 600 SIP sessions to support global consolidation of new internal conference bridge services.
