FOR IMMEDIATE RELEASE

OneStream Networks Adds Sales Channel Leader to Global Management Team

Expands Management Team with Addition of Michael Czerneda as Regional VP of Channel Sales

Rochester, NY, November 12, 2018 – [OneStream Networks](#), a leading global managed communications service provider, today announced that it has expanded its global management team with the addition of Michael Czerneda as Regional VP of Channel Sales. Michael will oversee Channel Relationships and Sales in support of OneStream’s global [cloud-based SIP](#), [unified communications](#), [SD-WAN](#), and [security services](#).

With over 28 years’ experience working in the UCaaS, CCaaS, Data Center, Premised-based PBX and Service Provider industries; Michael has spent most of the last 20 years in General Management and Sales Leadership positions. He joined BroadSoft as an RVP of the enterprise team in 2016 working extensively with direct enterprise customers along with the partner eco-system. Michael also held sales leadership positions with Saddleback Communications, Mitel Arizona, Quest, and Clear Data among others. Michael has served on the board of Junior Achievement of Arizona for 10 years. He holds a B.S. in Business from the Indiana University School of Business.

“Exceptional customer experience and sales execution is one of OneStream’s key differentiators,” adds Brian Skidmore, OneStream EVP Sales and Marketing. Michael will continue to manage and grow our sales channel to be the best in the industry. We welcome his experience and contribution and look forward to continued excellence within our channel partner relationships.”

About OneStream Networks

OneStream Networks is purpose-built for enterprise-grade cloud-based SIP trunking, unified communications, contact center services, data networking and security services. With availability in 100+ countries, global strategic peering networks, geo-redundant POPs and multi-provider SD-WAN and MPLS transport options, OneStream delivers unparalleled scope and reach for advanced cloud-based voice, UC, data and security. OneStream has become the standard for enterprise customers, VARs, and agents looking to create cost-savings, consolidation, vendor reduction and simplified management for single site and multi-site, multi-national applications. Customers and VARs/Agents count on OneStream for certified voice and data solutions and best-in-class performance, reliability and support.
